

The Watergate complex was completed as "low-rise" marina-style living in 1974. Originally built as apartments, the community completed its conversion to condominiums in 1979. The homeowners' association has become an influential and pro-active segment of the Emeryville community.

Spread out over 24 acres of manicured grounds, Watergate offers its residents a wide variety of amenities including heated pools, jacuzzis, steam and sauna rooms, tennis and raquetball courts as well as a full-service gym, recreation center, 24-hour security, parking accomodation and laundry facilities, not to mention the simple enjoyment of the park-like setting situated in a pristine marina environment. The Watergate community is quite diverse and represents a large percentage of the city's total popluation.
